PROFESSIONAL EXPERIENCE

Supadigi (<https://supadigi.com>)

Co-Founder

Antalya, Turkey
(On-Site)

May 2025-Present

- Founded and operated Supadigi as a solo full-stack developer, delivering end-to-end SaaS products from concept to production for multiple industries.
- Designed and built complete web and mobile applications with multi-tenant architecture.
- Launched and monetized several subscription-based platforms, achieving paying customers and recurring revenue.

IOTIQ GmbH

Frontend Lead

Leipzig, Saxony, Germany
(Remote)

June 2023-May 2025

- Lead a team of over five talented engineers.
- Took ownership of all aspects of frontend development, including UI/UX design, frameworks, languages, and libraries for projects to ensure optimal performance and user experience.
- Managed the team's tasks upholding code quality, ensuring that every piece of code aligns with industry best practices and project requirements.
- Engaged in regular communication with clients and product owners, providing project updates, and ensuring alignment to maintain a shared understanding and progress together towards project goals.
- Created internal UI libraries using **React**, **Tailwind CSS**, **ShadCN**, **Tanstack Table**, **Tanstack Router** and **Tanstack Query**.

IOTIQ GmbH

Full Stack Developer

Leipzig, Saxony, Germany
(Remote)

December 2022-June 2023

- In addition to my proficiency in backend technologies from my prior role, I ventured into frontend development, assuming a crucial role as a mediator between the frontend and backend teams
- Created UI and backend with **React**, **Angular**, **TypeScript**, **Java** and **Spring Boot**.

IOTIQ GmbH

Backend Developer

Leipzig, Saxony,
Germany (Remote)

January 2022-December 2022

- In my one-year tenure as a backend developer, I successfully delivered two projects. Following this, I was promoted to a full-stack developer role.
- Developed backend using **Spring Boot**, **Java** and **PostgreSQL**.

PROJECTS

- Projesunumu (Nov 2024-Aug 2025) (<https://projesunumu.com>) ([Google Play](#)) ([App Store](#))
 - Full-stack SaaS platform that lets real-estate developers create and share interactive, mobile-friendly project presentations with clients, complete with backend management and mobile app.
 - +15.000 users. Solo project.
 - **Golang, TypeScript, React, React Native, Expo, PostgreSQL, AWS S3, Docker, Nginx**
- UETDS Kamu (Jan 2024-July 2025) (<https://uetdskamu.com>) ([App Store](#))
 - Full-stack SaaS platform for passenger-transport companies to manage vehicles, drivers, routes and accounting with direct UETDS (Turkey's e-government transportation system) integration, enabling instant trip notifications and Excel import.
 - +10 active companies. Solo project.
 - Golang, TypeScript, React, React Native, Expo, PostgreSQL, AWS S3, Docker, Nginx
- Supadigi (May 2025-Present) (<https://supadigi.com>)
 - Marketing and portfolio website for my digital agency. Solo project.
 - **NextJS, TypeScript, Tailwind CSS, Framer Motion.**
- Order Tracker
 - Built a real-time workspace for a [machine part factory](#) to issue single-form shipping tenders, automate quote collection and eliminate manual email threads & spreadsheet chaos.
 - Implemented role-based system that handles tender creation, auto-sends secure links to carriers. Reduced manual processing time from days to hours.
 - **NextJS, React, TypeScript, PostgreSQL, AWS S3.** Solo project.
- Dinkatransfer (Dec 2024-Jan 2025) (<https://dinkatransfer.com>)
 - Full-stack airport-hotel transfer platform for Antalya tourism. Features an admin dashboard, real-time booking engine with integrated payment processing and a complete database of all Antalya hotels.
 - **NextJS, TypeScript, SQLite, Tailwind CSS.** Solo project.
- Antalyacityhomes (Jan 2025-May-2025) (<https://antalyacityhomes.com>)
 - Responsive real-estate marketplace, featuring multi-language support, advanced property search and filtering, dynamic listings pulled from a custom admin dashboard, SEO-optimized pages.
 - **NextJS, TypeScript, SQLite, Tailwind CSS.** Solo project.
- E-Edep (Aug 2024-May 2025)
 - Comprehensive school management platform for a school. Handles student enrollment, class scheduling, attendance tracking, behavior logging, exam reporting and parent notifications, all wrapped in a secure multi-role dashboard for admins, teachers and parents.
 - +1000 enrolled students and +50 teachers. Solo project.
 - **NextJS, TypeScript, PostgreSQL, Tailwind CSS.** Solo project.
- Culturati (June 2023- May 2025) (<https://culturati.eu>)
 - Funded by the European Commission, horizon europe ria project. A web app that revolutionizes museum experiences with customized games, curated routes and interactive features. Offers personalized recommendations.
 - Lead frontend team to develop the frontend using **React, VueJS, Ionic Framework, TypeScript**
- Co-Working (Feb 2023-June 2023)
 - Web app that provides a meeting room booking system for companies of all sizes.
 - Developed payment processing through PayPal, search and filter CRUD operations to view past and upcoming bookings using **NodeJS, Typescript, Sequelize, Tailwind CSS and React.**

-
- CoTwin (Aug 2022-Jan 2023) (<https://stfi.de>)
 - Web app that generates digital twins for an industrial machine builder.
 - Developed UI using **Angular** and **TypeScript**. Generated CRUD endpoints using **Spring Boot** and **Java**. Wrote migration scripts using **Flyway**.
 - DeskHero (Jun 2022-Oct 2022) (<https://desk-hero.de>)
 - Platform that allows employees to book office space on a flexible basis while helping companies manage office space.
 - Implemented real-time booking, check-in functionality and admin page for employers to manage their office spaces using **React**, **Spring Boot**, **TypeScript**, **Java**, **Redux** and **MySQL**.
 - ABAKUS (Feb 2022-July 2022) (<https://stfi.de>)
 - Web app streamlining circular fabric production: customer management, parameter based product-matching, enhancing efficiency for a specialized company.
 - Developed as a team-based Agile project with the use of Spring Boot and Angular.
 - Implemented database design, business logic, endpoints and authentication system using **Java**, **Spring Boot** and **MariaDB**.
 - LiquiTool (Feb 2022-June 2022)
 - Web app that simplifies liquidity planning, offering real-time overviews of company finances, aiding in identifying and addressing bottlenecks efficiently.
 - Implemented tax management features using **Java** and **Spring Boot**.
 - Wordpress Projects
 - Delivered WordPress sites with custom themes, integrations and performance optimization for small businesses.
 - [School](#), [Antalya Gymnastic](#), [Antalya Swimming Academy](#), [Animal Medicine Manufacturer](#), [Butcher](#), [Architect](#), [Construction](#)
